Product Data Sheet — GT09L

Tadpole Types: 1, 2, 3, 8, & 9

Description:

This tadpole seal is specifically designed to operate under highly abrasive conditions. It features an extremely high temperature Ceramic core in conjunction with a protective Inconel® wire stocking to reduce abrasive wear and tear.

Size:

Standard and custom sizes available. See Tadpole Types and potential sizes listed above.

Cover:

Knitted Inconel® wire stocking.

Core:

Twisted Ceramic Rope

Temperature:

1800° F /980° C

Application:

Tadpole seals are used in sealing oven doors, covers, ducts, dampers, panel joints and other applications where conformance to uneven flanges is required.

Chemical Resistance:

Inconel® wire and Ceramic rope are resistant to most chemicals. Please call Gaskets Incorporated for specific application concerns.

Other:

Tadpole seals have excellent mechanical properties. They are resilient and have excellent resistance to thermal shock, vibration, as well as most chemicals. They are used in a variety of high temperature industrial and refractory applications requiring superior temperature and insulation performance.
