Product Data Sheet — GT10G

Tadpole Types: 1, 2, 3, 8, & 9

Description:	Aluminum Foil on Fiberglass Tadpole seal
Size:	Standard and custom sizes available. See Tadpole Types and potential sizes listed above.
Cover:	1/32" Thick Aluminum Foil laminated to one side of woven Fiberglass Fabric with a special high-temperature adhesive.
Core:	Galvanized steel solid mesh
Temperature:	500° F /260° C
Application:	Tadpole seals are used in sealing oven doors, covers, ducts, dampers, panel joints and other applications where conformance to uneven flanges is required.
Chemical Resistance:	Fiberglass textiles, aluminum and galvanized steel have excellent resistance to most chemicals. Please call Gaskets Incorporated for specific application concerns.
Other:	Aluminized Fiberglass and galvanized steel have excellent mechanical properties. They are resilient, have excellent resistance to thermal shock, vibration, and to most chemicals. They are used in a variety of industrial applications requiring superior temperature and insulation performance.
